## EDUCATION

### Bachelor of Computer Engineering

University of Tehran, Tehran, Iran

GPA: 19.22 / 20 (4 / 4)

2016-Present

Related Courses : Computer Networks(20/20), Computer Networks Security(20/20), Distributed Systems(20/20), Operating Systems(20/20), Artificial Intelligence(20/20), Neural Networks(18/20), Database Design(19.2/20), Linear Algebra (19.1/20), Engineering Probability and Statistics(20/20)

### Diploma of Math and Physics

Salam High School, Tehran, Iran

GPA: 19.98 / 20 (4 / 4)

2012-1016

## HONORS AND AWARDS

- **Ranked 2<sup>nd</sup>** University of Tehran  
Among CE class of 2020
- **Honorary Award of FOE** 2016-2017, 2017-2018, 2018-2019  
Awarded to the top three students of each engineering field each year.
- **Faculty of Engineering Fellowship Award** 2017-2018, 2018-2019  
Received Faculty of Engineering fellowship award as an exceptionally talented student.
- **IEEEExtreme 13.0** 2019  
Our team (OnceUponATimeInUT) ranked 2<sup>nd</sup> in Iran and globally 101<sup>st</sup> among 2,781 teams.
- **Ranked in the Top 0.13% (99.87 percentile)** 2016  
Among more than 168,000 participants in Iranian nationwide university entrance exam.
- **RoboCup Iran Open** 2015  
9<sup>th</sup> place among more than 100 teams in junior rescue league.  
Awarded as the super team of rescue robots among more than 30 teams.
- **Iranian Olympiad in Informatics (Computer Science)** 2014, 2012  
Accepted in first round of Olympiad as top 25 percent of talented Iranian students.

## RESEARCH INTERESTS

- Computer Networks
- Distributed Systems
- Applied Machine Learning
- Network Security
- Computer Systems
- Data Management

## RESEARCH EXPERIENCES

### Research Assistant

Under Supervision of Dr. Behnam Bahrak

*Inter-country Study of Similarities and Influences*

2019-2020

Country similarities were analyzed based on most read books. The effect of language, religion and geological distance on book similarity and inter-country influences was studied.

The manuscript is under review.

### Data Scientist Intern

PAD Lab, University of Tehran

*Machine Learning Application*

2019

The "Hands-on Machine Learning" book was read and Contributed to Kaggle competitions, such as the Titanic competition, house price prediction, and IEEE fraud detection.

## TEACHING EXPERIENCES

### Teaching Assistant

University of Tehran

"Operating Systems" Professor M. Kargahi

2019-present

"Database Design" Professor A. Shakery

2019-present

"Artificial Intelligence" Professor H. Fadaei and Professor H. Moradi

2019-2020

<b>"Formal Language and Automata"</b> Professor H. Hojat	2019-2020
<b>"Advance Programming"</b> Professor R. Khosravi and Professor A. Sadeghi	2018-2019
<b>"Discrete Mathematics"</b> Professor S. Mohammadi	2018-2019
<b>IEEE Data Science Winter School</b>	<b>University of Tehran IEEE Student Branch</b>
<i>Machine Learning and Python Instructor</i>	2019

## PROJECTS

---

<b>GHS Algorithm for Finding MST</b>	<i>Distributed Systems</i>
Implemented GHS distributed algorithm for finding minimum spanning tree in a weighted graph. (Implemented in Java using Kompics)	
<b>MapReduce Algorithm for Counting Words</b>	<i>Distributed Systems</i>
Implemented distributed MapReduce algorithm for counting occurrences of each word in a text. (Implemented in Java using Kompics)	
<b>Dynamic Forwarding and Routing in a Network</b>	<i>Computer Network</i>
Implemented Distance Vector routing protocol, which uses Bellman-Ford algorithm, for routing and forwarding message among virtual nodes. Also implemented traceroute command. (Implemented in Python)	
<b>TCP over UDP</b>	<i>Computer Network</i>
Implemented some features of TCP New Reno protocol over UDP such as reliable data transfer, congestion control and flow control. Also implemented Nagle algorithm for improving efficiency. (Implemented in Java)	
<b>Proxy Server</b>	<i>Computer Network</i>
Implemented a proxy server with logging, caching, injection and accounting features. (Implemented in Python)	
<b>BitTorrent</b>	<i>Computer Network</i>
Implemented a BitTorrent system with custom network topology. (Implemented using Mininet VM and Python)	
<b>Food Ordering Application ("Loghme")</b>	<i>Internet Engineering</i>
Developed web application for online food ordering and delivery. (Backend: Java(Spring framework) - Frontend: JavaScript(Reactjs) - DB: MySQL - Deployment: Docker, Kubernetes)	
<b>Traffic Signs Detection in Real-World Images</b>	<i>Neural Networks</i>
Implemented CNN and fine-tuned it also used drop out, data augmentation and batch normalization for improving the network results. (Implemented in Python using Keras)	
<b>Air Pollution Forecasting</b>	<i>Neural Networks</i>
Implemented RNN, LSTM and GRU for series prediction. and implemented various methods for handling missing values. (Implemented in Python using Keras)	
<b>Database for a blood center</b>	<i>Database Design</i>
Implemented a database with functions, triggers, views and indexes for a blood center. (Implemented in SQL Server)	
<b>Compiler for SMOOLA Language</b>	<i>Compiler Design and Implementation</i>
Implemented four phases: lexical and syntax analyzer, name analyzer, type analyzer and code generator. (Implemented in JAVA using ANTLR)	
<b>Socket Programming</b>	<i>Operating Systems</i>
Implemented server heartbeat, UDP and TCP socket protocols for Battleship game. (Implemented in C)	
<b>Multi-process Text Searching System</b>	<i>Operating Systems</i>
Used pipes for communication between processes, which filter specific records in multiple files and sort them by a particular field. (Implemented in C++)	
<b>New Features for xv6 kernel</b>	<i>Operating Systems</i>
Implemented new features for xv6 operating system, including: new system calls, CPU scheduling and memory management. (Implemented in C)	
<b>Multi-cycle MIPS</b>	<i>Computer Architecture</i>
Implemented MIPS multi-cycle processor. (Implemented in verilog)	

## TECHNICAL SKILLS

---

**Programming Languages:** Python, JAVA, C, C++  
**Database:** MySQL, SQLServer

**Machine Learning Python Libraries:** Numpy, Pandas, Seaborn, Scikit-learn, Keras, Pytorch

**Hardware Design Languages:** Verilog, SystemVerilog

**Web Development:** Django, React, JavaScript, HTML, CSS

**Simulation:** ModelSim, Quartus, Proteus

**Tools:** Git, L<sup>A</sup>T<sub>E</sub>X, Wireshark, Mininet, Gephi, Postman, Jupyter notebook, Maven

**Operating Systems:** Linux(Ubuntu), MacOS, Windows

## WORKING EXPERIENCES

---

**Back-End Developer (Intern)**

**Lamasoo Company**

*Worked as a developer in a hotel booking start-up.*

*Summer 2018*

**Front-End and Back-End Developer**

**Summer of Code (University of Tehran)**

*Developed a site for online contests as a member of DMC team.*

*Summer 2017*

## VOLUNTEERING EXPERIENCES

---

**Member of FSEN student branch**

*FSEN Conference 2019, Tehran*

**Member of Organizing Team**

*Machine Learning Summit 2018, Tehran*

**Membership Chairperson**

*ACM student branch of University of Tehran, 2017*

## LANGUAGES

---

Persian (Native), English (Fluent), German (Familiar), Arabic (Familiar)
